

CRAFTED IN PAKISTAN · SHIPPED FROM GERMANY

BRAND & STYLE GUIDE

Fonts · Colors · Logo Usage · Voice & Tone

Brand Overview

Tagline

“Crafted to Last. Lit to Inspire.”

Philosophy

We don't chase trends — we chase things that outlast them. Every hide is hand-selected, every lamp hand-carved, made for people who'd rather own one exceptional object than ten forgettable ones.

Origin story

KAPTAN is a tribute to mastery — bringing together the timeless art of Pakistani leatherwork and the natural beauty of authentic Himalayan salt, mined from the heart of the Khewra range.

Positioning line (always paired with the logo where space allows)

CRAFTED IN PAKISTAN · SHIPPED FROM GERMANY

Naming

The brand name is always written **KAPTAN** — full caps, never lowercase or mixed case, never abbreviated. Category descriptors seen in copy: “heritage craftsmanship,” “authentic Himalayan salt,” “hand-carved,” “hand-selected.” Voice is confident, unhurried, quality-over-quantity — short declarative sentences, no exclamation marks, no hype language.

Logo & Mark

*Primary lockup
(fixed black background)

*Cutout / on light or colored
backgrounds
kaptan-logo-transparent.png*

*Favicon / app icon
kaptan-favicon.png*

Composition

A circular monogram (script “K” inside a double ring) sits above the full wordmark “KAPTAN” in tracked-out capitals. The monogram and wordmark are always shown together as one unit — do not separate them or use the monogram alone as a standalone icon except for favicons/app tiles.

Usage rules

- Minimum size: 24 mm wide in print, 80 px wide on screen — below this the wordmark stops being legible.
- Clear space: leave a margin of at least half the logo's height clear on all sides.
- Do not recolor the mark — it is gold (#C9A227 / #D4A325) on black, or the transparent cutout on light/off-white surfaces only.
- Do not stretch, skew, rotate, add drop shadows, or place on busy photography without a solid or scrim background behind it.
- Do not recreate the wordmark in a different typeface — always use the supplied artwork file.

Note: the only logo asset currently on file is the black-background square lockup, plus a transparent cutout derived from it for this guide. For print applications on colored stock (business cards, packaging, signage) commission a dedicated horizontal wordmark-only variant and a one-color (all-gold or all-black) version from a designer before printing.

Color

Gold — the brand color

Gold — Primary (dark backgrounds)

HEX #C9A227 · RGB 201, 162, 39

Default gold on black surfaces: logo, headings, icons, borders, prices.

Gold — Light-mode standard

HEX #D4A325 · RGB 212, 163, 37

The same role as primary gold, tuned for use on the off-white light-mode background. Use this exact value for gold text/icons/borders whenever the surface behind it is light.

Gold — Vivid / hover

HEX #E4C55A · RGB 228, 197, 90

Hover and active states for gold buttons and links (both themes).

Gold — Secondary / muted

HEX #A8841F · RGB 168, 132, 31

Secondary gold for subtitles, de-emphasized labels, large numerals.

Neutrals

Black — Brand Black

HEX #000000 · RGB 0, 0, 0

Primary dark-mode background; the color the logo is built on.

Near-black surface

HEX #0D0D0D · RGB 13, 13, 13

Secondary dark-mode surface (cards, panels) — one step lighter than pure black.

Warm grey surface

HEX #1A1A1A · RGB 26, 26, 26

Dark-mode card/surface color, elevated one step further from black.

White

HEX #FFFFFF · RGB 255, 255, 255

Primary text on black in dark mode.

Off-white — Light-mode background

HEX #F7F4EC · RGB 247, 244, 236

Page background in light mode. Deliberately warm, never pure white.

Off-white — paper tone

HEX #F9F6EE · RGB 249, 246, 238

Reference paper/stock tone for print collateral — closest matte-stock equivalent to the on-screen light background.

Ink — Light-mode text

HEX #141210 · RGB 20, 18, 16

Primary text color in light mode. A warm near-black, not pure #000.

Status Colors

Used only for small functional UI signals (stock levels, form errors, confirmations) — never as decorative or primary brand color. Keep gold, black and white dominant; these appear only where they are functionally meaningful.

Signal	Light mode	Dark mode
Error / out of stock	#B91C1C	#F87171
Warning / low stock	#A16207	#FBBF24
Success / confirmed	#15803D	#4ADE80

Typography

Display & Headings — Playfair Display

Aa Bb Cc — Leather Jackets

Serif display face. Used for every heading (H1–H6), the hero headline, section titles and pull quotes. Weights used: 400, 500, 600, 700, plus 400 italic. (Rendered above in Times as a visual stand-in — install the real Playfair Display from Google Fonts for production use.)

Body & UI — Inter

Aa Bb Cc — Bold style for every season.

Sans-serif workhorse. Used for all body copy, navigation, buttons, forms and captions. Weights used: 300, 400, 500, 600, 700. (Rendered above in Helvetica as a visual stand-in for Inter.)

Numerals & Prices — JetBrains Mono

\$248.00 · 10,000+ · #KAP-2291

Monospace face reserved for prices, order numbers and other numeric data — anywhere figures need to align and read as precise. Weights used: 400, 500. (Rendered above in Courier as a visual stand-in for JetBrains Mono.)

Kicker / eyebrow label treatment

OUR PHILOSOPHY

Small caps-style label set above headings and section titles throughout the site: Inter, bold, all uppercase, letter-spacing 0.2em–0.4em, set in gold. Always a short phrase (1–3 words). This is the single most repeated typographic signature of the brand — use it consistently for any new section titles.

Shape, Buttons & Interaction

Corners

Structural elements (cards, panels, inputs, buttons, images) are sharp-cornered — border-radius 4px or square. Fully rounded (pill/circle) shapes are reserved for small functional elements only: icon buttons, avatar frames, badges/dots and carousel indicators. This contrast (square structure, round accents) is deliberate — keep it.

Buttons

Primary	Solid gold fill, black text, square corners. Hover: gold → vivid gold (#E4C55A).
Secondary	Transparent fill, 1px gold border, gold text, square corners. Hover: fills solid gold with black text (full invert).
Icon buttons	Circular, 1px gold border at reduced opacity, gold icon on a black/40% scrim when placed over photography.

Photography with text overlays

Any headline or label placed over a photograph (hero banners, category tiles, video thumbnails) sits on a fixed black scrim at 30–70% opacity, with white or gold text on top. This treatment does not change between light and dark site themes — the image always dictates a dark overlay, regardless of the surrounding page background. Apply the same rule to printed materials that combine photography with headline text: always run a dark scrim behind the type, never place white/gold type directly on unscrimmed photography.

Quick Reference

Element	Spec
Brand name	KAPTAN — always full caps
Tagline	Crafted to Last. Lit to Inspire.
Positioning line	CRAFTED IN PAKISTAN · SHIPPED FROM GERMANY
Headings font	Playfair Display (400/500/600/700, 400 italic)
Body / UI font	Inter (300/400/500/600/700)
Numerals font	JetBrains Mono (400/500)
Gold — dark mode	#C9A227
Gold — light mode	#D4A325
Gold — hover/vivid	#E4C55A
Gold — secondary/muted	#A8841F
Black	#000000
Light-mode background	#F7F4EC
Light-mode text	#141210
Corner radius	Sharp / 4px — pill shapes for icons only
Label / kicker style	Uppercase, bold, tracked 0.2–0.4em, gold

Keep this page pinned up or exported separately as a one-sheet cheat sheet for quick use by designers, printers and social media managers.
